

# Using the National Grid

See the interactive version on [www.ordsvy.gov.uk](http://www.ordsvy.gov.uk)

**1** The National Grid provides a unique reference system, which can be applied to all Ordnance Survey maps of Great Britain, at all scales.

**2** Great Britain is covered by 100 kilometre grid squares, each grid square is identified by two letters, as shown on Diagram A.

**3** On Ordnance Survey maps, these squares are further divided into smaller squares by grid lines representing 10 kilometre spacing, each numbered from 0 to 9, from the south west corner, in an easterly (left to right) and northerly (upwards) direction, as shown in Diagram B.

**Diagram A**

**Diagram B**

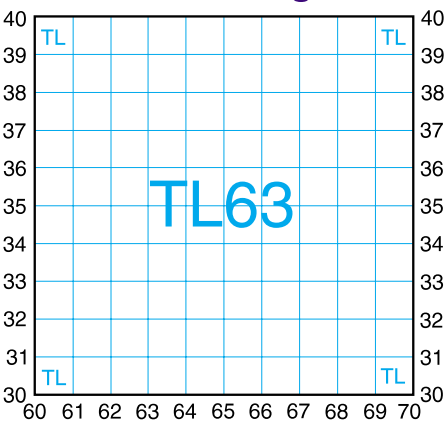

**4** Using this system, you can identify a 10 kilometre grid square. For example, here is TL63. After the letters you quote the **Eastings** (6) first, then the **Northings** (3).

If you have trouble remembering say... stairs

Along the hall, THEN the stairs

**Diagram C**

**5** On Ordnance Survey Landranger® maps, you can find the two grid letters TL on the legend, or on the corner of the map, and the grid has been further divided into 1 kilometre intervals, as shown in Diagram C. You can estimate distances between the grid lines to give a more precise reference.

**6** Turn the page and see how easy it is to use a 6 Figure Grid Reference to pinpoint a place on the map...

# Using the National Grid continued

## The 6 Figure Grid Reference

**7** The 6 Figure Grid Reference is very useful to locate a particular place on a map.

**8** By estimating the eastings and northings to one tenth of the grid interval, you can specify a full 6 Figure Grid Reference, accurate to within 100 metres on the ground...

**9** All you do is estimate how many tenths away from the grid your point falls. For instance, the point in **Diagram D** is 3 tenths east of grid 62 and 7 tenths north of grid 31.

**10** Once again, reading from the south west corner, quote all the eastings first, then the northings. The 100 metre grid reference of the point in the diagram is shown like this: TL 623317.

**Diagram D**

**11** Here is an extract from a 1:50 000 scale map. Use the National Grid Reference System to find:

- The Church at TL683365**
- The Windmill at TL726350**
- Mill Farm at TL701352**

Map extract from Landranger Map Sheet 154.
